

Dear administration and teaching staff,

We are excited to share the FireSmart BC Education Program, a free, inclusive, and interactive teaching resource offering complimentary educational materials for your school. Aligned with the BC school curriculum, these resources help students learn about wildfire safety and prevention in an engaging way. To add to the excitement, **we are also hosting a spring classroom contest with fantastic prizes up for grabs!**

The FireSmart BC Education Program introduces students in grades K-12 to FireSmart concepts, including how to make homes and communities more resilient to wildfire. Aligned with the BC school curriculum, the program is designed to make learning fun and empower youth to become champions of fire safety in their communities. Themes include safety, fire science, ecosystem stewardship, lessons from First Peoples, and wildfire mitigation and prevention.

Included in this package:

- **Two Posters:** To be displayed in the teacher's lounge or on the main bulletin board, providing information about the FireSmart BC Education Program.
- **Two Contest Flyers:** Outlining the FireSmart BC Spring 2026 Classroom Contest—an exciting contest offering fantastic prizes.

We encourage you to share these curriculum-aligned materials with your staff and promote participation in the **FireSmart BC Spring 2026 Classroom Contest**. By incorporating fire safety education into lesson plans, you are equipping students with the knowledge and skills to protect themselves, their families, and their communities from the risks of wildfires.

To learn more about the FireSmart Education Program, visit firesmartbc.ca/educationprogram.

If you have any questions, please email education@firesmartbc.ca.

Thank you for supporting the FireSmart BC Education Program. We look forward to inspiring and educating your students and teachers.

Best regards,
